

Powering your fleet's transition

One energy solution for petrol, diesel and electric

powered by

Juice

Transition without disruption

Electrifying a fleet doesn't happen overnight. Most businesses operate a mix of diesel, petrol and electric vehicles for years. That creates complexity.

You need structure.

Fuel cards for petrol and diesel. Charging cards for BEVs and PHEVs.¹ One platform. One consolidated invoice.

With DriveElectric, operational oversight remains consistent.

Not fragmented.
Not reactive.
Controlled.

1. BEV = Battery Electric Vehicle, PHEV = Plug-In Hybrid Electric Vehicle

When complexity starts to **scale**

Managing fuel and EV charging separately increases cost, admin, and complexity.

DriveElectric brings everything together, helping you reduce spend, simplify operations, and stay in control as your fleet evolves.

One fleet.
One platform.
Total visibility and control.

Lower fleet energy costs

- Weekly commercial fuel pricing across major forecourts
- Spend controls to prevent overspend and misuse
- Cost-per-mile visibility to support smarter decisions

Remove admin burden

- One HMRC-compliant invoice across fuel and charging
- Automated reporting and simplified VAT recovery
- No receipts, expense claims, or manual reconciliation

Keep drivers moving

- Nationwide fuel station access
- Extensive public EV charging network
- RFID cards and mobile app for fast, cashless use

Stay in control as you electrify

- Fuel and EV charging managed in one platform
- Carbon and energy mix reporting to support sustainability goals
- Policy controls and driver-level accountability

One commercial framework

DriveElectric has partnered with Juice Fuel Management to deliver a complete fuel and EV charging solution for business fleets.

Petrol. Diesel. Hybrid. Electric. All managed under one energy strategy.

Weekly commercial pricing across major forecourts. Access to extensive public charging networks.

Secure RFID charging cards. PIN-protected fuel cards. Mobile app access.

Consolidated reporting. Controlled spend. One HMRC-compliant invoice.

All in one place.
Managed together.
Reported together.

	Shell	bp
Branded forecourts	1,100 Shell sites plus 2,500 Esso, Texaco and Gulf stations	1,200 bp sites plus 2,300 Esso, Texaco and Gulf stations
Owned charging network ¹	9,000 Shell Recharge charge points using 100% certified renewable electricity	7,000 bp pulse charge points including 3,500 rapid and ultra-rapid units
Partner network access	Access to 40,000+ UK public charge points	Access to 51,000+ UK public charge points
Roaming partners	Shell Recharge On-street, Ionity, Osprey, Source London, Connected Kerb	Blink, Fastned, Shell Recharge, evyve, Ionity, ChargePoint, ESB energy, raw Charging, alfa power, Osprey, Plug-n-go, Allego, EVBOX, Instavolt, mfg, mer & Source London

Loyalty	Shell GO+ Rewards	BPme Rewards

1. Forecourt and Network Figures are changing rapidly, accurate data 13 February 2026.

Electric expertise. Proven heritage.

DriveElectric has specialised in electric vehicles for more than 15 years.

We were founded to accelerate EV adoption. Not adapt to it.

Established in 1994 as Fleetdrive Management. Rebranded as DriveElectric in 2008. Supporting electrification at scale ever since.

Part of the Jurni group of customer-focused mobility brands.

Dedicated account management. 5-star rated service. Long-term client partnerships.

Expertise in electric.
Built on heritage.
Delivered with accountability.

Control must scale with **transition**

Fuel and charging cannot
sit in separate systems.

Disconnected data creates blind spots.
Separate invoices distort visibility.
Manual reconciliation slows decisions.

DriveElectric brings fuel and public
charging into one connected platform.

Built for control.

Live oversight.
Clear reporting.
Total accountability.

Your energy mix is **changing**

Control must remain consistent.

As fleets transition, fuel and charging sit side by side.

Oversight becomes more complex. Visibility becomes more important.

That requires driver-level accountability, configurable spend limits, and clear policy alignment.

Track cost per mile. Monitor energy mix. Support carbon reporting.

No uncontrolled drift.
No hidden exposure.
No financial blind spots.

Energy **strategy.** not just supply

Fuel and charging are operational inputs. Energy management is a strategic discipline.

Structured oversight. Integrated reporting.
Commercial governance.

Designed for fleets in transition.

As your vehicles evolve, your energy strategy evolves with them.

With DriveElectric.

Take **control** of fleet energy

Energy management is not operational admin.

It is financial governance.

Fuel and charging aligned. Visibility without fragmentation. Control without compromise.
